➤ Problems Statement And Data Source

INDIA

Update as on 01/08/2021

Total Coronavirus Cases : 31,934,455(100%)

Recovered : 31,099,771(99%)

Total Deaths : 427,892(1%)

Graphs Shows Cases, Recovery & Death Rate by State Wise

Covid-19 Recovery rate according to states

Covid-19 Death rate according to states

Covid -19 Cases according to states

➤ Objective & Methodology & Solution Description

- **Good healthy food to avoid infection**

Changing your eating habits and your environment can help you eat healthier foods.

A healthy diet is good for your overall health. It also can help you reach a healthy weight and stay there.

To improve your eating habits, it's best to make small lifestyle changes that you can keep doing over time.

❖ Analysis Carried Out With Information Visualization

**Total No People Attended Survey
Age Group Wise**

**Total No. Of Response : 102 Responses
Data From Hyderabad**

**Total No. of People Attended Survey
Gender Wise**

❑ How Often People Do Exercise ?

Exercise delivers oxygen and nutrients to your tissues & helps your cardiovascular system work more efficiently.

❑ How Often People Do Exercise ?

- From the Visualization 20 – 25 age group people mostly Never to do exercise
- From 25 -30 age group people mostly do once a week
- From 30 – 40 age group people mostly do two or three time a week

❑ How Often People Do Exercise ?

According to Gender wise

- From Visualization Males mostly do workout once a week and some are do two or three time a week
- Females do exercise mostly two or three times a week

☐ According to u which food as more nutritions and vitamins ?

**Food as more Nutritions&Vitamins
Total Response**

According to Age Group 25-30

- Baked food
- Dairy food
- Fast food
- Fruits
- Meat

❑ According to u which food as more nutritions and vitamins ?

- From the visualization the 20 – 25 age group people selected vegetable as a food which as more nutrition & vitamins
- And from 25 – 30 age group people selected fruits as a food which as more nutrition & vitamins

☐ **Did you ever faced any health issue after eating fast food?**

☐ Did you ever faced any health issue after eating fast food?

Response Age Group Wise

- From the visualization the 20 – 25 age group people mostly choose disagree
- 25 – 30 age group mostly choose Neutral

☐ Food Mostly Taken In Launch ?

- **Food mostly taken in lauch as rice & vegetable**

❑ Food Mostly Taken In Launch ?

Food Mostly Taken in Launch AgeWise

- From visualization 20 – 25 age group mostly selected rice & vegetables
- 25 – 30 age group mostly selected rice & vegetables

☐ Mostly Eated Non – Veg Food ?

Non-Veg Food Mostly Consumed

Mostly eated Non-Veg food Age Group wise

From the visualization 20 – 25 age group people choose chicken as mostly eated food

30 – 40 age people choose chicken as mostly eated food

❑ How many liters of water consumed daily ?

Water Consumed Age Group Wise in liters

- **20 – 25 age group people drink water mostly 5 & more liters**
- **25 – 30 age group people drink water mostly 3 liters**

Water Consumed in liter
Total Response

➤ Impact

- From the survey and analysis (Visualization) there is some impact on diet control
- People are toward increasing immune systems by doing work out
- Chicken is mostly eaten Non – veg but is too health risk food
- Vegetables are mostly eaten food is good for health
- 20 – 25 age group people mostly aware in protecting they health
